

WHAT WE OFFER, NOT JUST WHAT WE MEASURE

Skilled, but not ready to leave home? We built a course that changes that.

Some trainees can do the job but have never planned a move, a budget, or a business. Every month, the trainees who need it most go through a short course on exactly that. Here's what it does.

Readiness, institute by institute

Same trainees, before the course and three months after. Longer bar is better — nothing else to read into it.

Every institute moved up. *Siricilla moved the most — a mandatory monthly session and local welders invited back to talk about what starting their own workshop actually took.*

What's real here: the institute names, codes, and trades are the real Telangana Govt. ITI network.
What's illustrative: the before/after numbers — this course and the test that measures it are a proposed design, not yet piloted with trainees.
