

FOR THE PROJECT OFFICER — PLAIN-LANGUAGE SUMMARY

What's happening across the district, *without asking anyone?*

Today, knowing how a centre is doing usually means calling an instructor, waiting for a register, or compiling numbers by hand. This report is what that phone call would have told you — without making it.

Since your last update, **3 centres improved their readiness** — the best mover was: **Govt. ITI Siricilla** — and **3 centres completed this month's assessments in full**. **9 trainees moved into "Ready"** this month, while **4 entered intervention**. One trade, **Fitter**, is **flagged for a cross-centre review** rather than a single-centre fix — the same pattern your Attention Report calls out as systemic. All of this without a single phone call to an instructor.

Since your last update

What moved, in plain numbers — no report typed up by hand, no register to chase down.

WHAT THESE NUMBERS MEAN IN PRACTICE

Best mover — Govt. ITI Siricilla: this centre's readiness climbed the most of any in the district this month, and it's also the only centre with every trade on track — worth understanding what they're doing right.

Flagged for cross-centre review — Fitter: the same trade your Attention Report flags as a systemic pattern across 3 institutes. Seeing it surface here too, independently, is a second confirmation that this needs a curriculum-level look rather than a single visit.

9 in, 4 out: more trainees are entering "Ready" than are entering intervention this month — a net-positive movement, though the 4 who slipped are worth a name-level look in the centre cards on the next page.

Convenience Report — District At A Glance

Every centre, right now

Which trades at each centre are flagged for review — the same detail you'd normally have to call the ITI officer to get, updated automatically instead.

Govt. ITI Siricilla

All 5 trades clear

Electrician, Fitter, Welder, Electronics Mechanic, and Carpenter — every trade here is running clean.

Govt. ITI Mallepally

7 of 13 trades flagged

Just over half of this centre's trades need a look — the largest centre in the district, so worth a structured review rather than one visit.

Govt. ITI Karimnagar

2 of 7 trades flagged

COPA and Electronics Mechanic are the two worth watching here; the rest of this centre is on track.

Govt. ITI Jagityal

5 of 5 trades flagged

Every trade this centre runs is currently flagged — worth understanding whether this is one shared root cause.

Govt. ITI Khammam

3 of 3 trades flagged

All three trades at this centre need a look this month.

Govt. ITI Kothagudem

4 of 4 trades flagged

Every trade this centre runs is currently flagged for review.

Govt. ITI Nizamabad

2 of 2 trades flagged

Both trades at this centre — Electrician and Fitter — need a look.

Govt. ITI Adilabad

2 of 2 trades flagged

Both trades at this centre — Electrician and Fitter — need a look.

Govt. ITI Warangal

3 of 3 trades flagged

This is the centre your Attention Report ranks as the single clearest priority this month.

Test this by asking: "What information would you normally have to call the ITI officer to get — and does this answer it?"
